NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:

EXAMPLE: 180700 447000

1. Take the two letters preceding the sheet number. TQ

2. Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin. 180700

3. Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin. 447000

4. The resulting four figure number is the Easting and Northing. The full ten figure reference is given by writing first the Easting followed by the Northing and then by the sheet number. TQ 180700 447000

VEGETATION CLASSIFICATION

Where space permits, trees and scrub symbols in woods are shown in groups of four, three, two or single to indicate close, medium, open or scattered density of trees or scrub.
