COMPILATION DATA

Levelled.....1965
Boundaries.....Jan 1973

† 1:2500 scale
* 1:1250 scale (photographically reduced)
(a) Surveyed.
(b) Reconstituted from former County Series plans and revised.
(c) Revised.

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.
Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.

The representation on this plan of a road, track or path is no evidence of the existence of a right of way.

The alignment of tunnels where shown is approximate.

VEGETATION CLASSIFICATION. Where space permits, tree and scrub symbols in woods are shown in groups of four; three, two or singly to indicate close, medium, open or scattered density of trees or scrub.

BOUNDARIES

England & Wales

Geographical County
Admin County / County Borough
London Borough
County Districts
Civil Parish
Rural Borough
Parly Constituency & Ward

Where the boundary of an Admin Co, County Borough or Co of City is coincident with that of a geographical county, the symbol for the latter is shown. County type boundary is usually coincident with civil parish boundary and the symbols for both are shown, e.g. Burgh Const & Burgh Bdy, but where any other boundary coincides with that of a civil parish the symbol for the latter only is shown, e.g. Co Const & Dist Bdy

AREAS

Area measurement is to plan edge only.
The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: 4267.....parcel number
1·809ha.....area in hectares
4·47.....area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls.
Enclosures or features joined for measurement of area.....†
Limit of area within which individual parcels are not shown.....†

To convert hectares to acres multiply by 2·471 05
To convert acres to hectares multiply by 0·404 69

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:—

1. Take the two letters preceding the sheet number.....TQ
2. Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin.....058
   Estimate tens of metres from the grid line to the point (distance =).....8
   The resulting four figure number is the Easting.....0588
3. Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin.....291
   Estimate tens of metres from the grid line to the point (distance =).....6
   The resulting four figure number is the Northing.....2916
4. The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing.....TQ 0588 2916.
