

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.
Plans, which may contain later levelling information and particulars of bench marks
which have been shown, are obtainable from the Director General, Ordnance Survey.
Information on this plan of a road, track or path is no evidence of the existence of a right of way.
The alignment of tunnels where shown is approximate.

PLAN TF 3828-3928

P.T.P.	Police Telephone Pillar
R.H.	Round House
R.P.	Revision Point
S.	Stone
S.B.	Signal Box
S.Br.	Signal Bridge
S.D.	Sundial
S.L.	Signal Light
S.	Sluice
S.P.	Signal Post
Spr.	Spring
S.Sta.	Signal Station
T.C.B.	Telephone Call Box
T.C.P.	Telephone Call Post
Tk.	Tank or Truck
Tr.	Trough
ts.	Traverse Station
W.	Well
Wb.	Weirbridge
W.P.	Wind Pump
Wh.	Works
W.Pt.	Water Point
Wr.T.	Water Tap

 Non-coniferous trees
 Coniferous trees
 Surveyed trees
 Orchard trees
 Coppice, osier
 Scrub
 Bracken
 Heath
 Rough grassland
 Marsh, saltings
 Reeds

VEGETATION CLASS
groups of four, three, two

space permits, tree and scrub symbols in woods or
gate close, medium, open or scattered density of

England & Wales			Scotland		
Geographical County			Geographical County		
Admin. County			County Council		
County Borough			County of the City		
London Borough			Burgh		
County District			Dist. Bd.		
Civil Parish			Civil Parish		
Rural Parish			Burgh, Coats & Ward Bd.		
Burgh Coats & Ward Bd.			Parly Consistories & Wd.		
Coast Bd.			Coast Bd.		

Where the boundary of an Admin. Co., County Borough or Co. of City is coincident with that of a geographical county, the symbol for the latter is shown. County type boundary is usually coincident with civil parish boundary and the symbols for both are shown, e.g. Burgh Coats & Ward Bd., but where any other boundary coincides with that of a civil parish the symbol for the latter only is shown, e.g. Burgh Coats & Ward Bd., Co. Coast & Dist Bd.

Boundary markings

B.B.	Base of Bank	C.R.	Centre of Road	F.F.	Face of Fence	T.B.	Top of Bank

Imperial equivalents for metric boundary markings
 0.91m = 3 ft. 1.22m = 4 ft.

Endures or features joined for measurement of area 1
Limit of area within which individual parcels are not shown 1
To convert hectares to acres multiply by 2.470 85 1
To convert acres to hectares multiply by 0.404 69 1

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are 100 metres apart. To give a unique reference defining the position of a point to within 10 metres it is as follows

EXAMPLE From sheet QG 0529

1. Take the two digits preceding the sheet number 295
2. Take the west edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin 058
3. Estimate metres from the grid line to the point (Distance x) 8
The resulting four figure number is the Easting 295 058
4. Take the south edge of the grid square in which the point lies and read the figure opposite this line on the east or west margin 291
5. Estimate metres from the grid line to the point (Distance y) 291
The resulting four figure number is the Northing 291 058
6. The full ten metre reference is given by writing first the letters followed by the Easting and Northing QG 0529 291 058

For further information see "An introduction to the Projection for Ordnance Survey Maps and the National Reference System."

TF 3828-3928

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:—

EXAMPLE from sheet TQ 0529

1. Take the two letters preceding the sheet number.....TQ
2. Take the west edge of the grid square in which the point lies and the figure opposite the line for north or south.....292
3. Estimate the number of metres from the grid line to the point (distance a).....058
4. The resulting four figure number is the Easting.....058H
5. Take the south edge of the grid square in which the point lies and the figure opposite the line for north or south.....291
6. Estimate the number of metres from the grid line to the point (distance b).....059
7. The resulting four figure number is the Northing.....2916
8. The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing.....TQ 058H2916

For further information see 'An introduction to the Projection for Ordnance Survey Maps and the National Reference System'.
