

COMPILED DATA

Levelled 1964.65
Boundaries Oct 1973

(b) Jun 1973

HEIGHTS are given in METRES above the Newlyn Datum.
Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.
The representation on this plan of a road, track or path is evidence of the existence of a right of way.
The alignment or course where shown is approximate.

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

Imperial equivalents for metric boundary markings
0.91m = 3ft 1.22m = 4ft

AREAS

Area measurement is to plan edge only.
The number and area, in hectares (ha) and acres, is shown within each parcel of land.
Enclosures or features joined for measurement of area are shown as one area.
EXAMPLE: 4267 parcel number
1-807ha area in hectares
4-47 area in acres
When identifying a parcel it is important to specify the number of the plan on which it falls.
Limits of area within which individual parcels are not shown.
To convert hectares to acres multiply by 2.47105
To convert acres to hectares multiply by 0.40469

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:

EXAMPLE from sheet TQ 0529

1. Take the two letters preceding the sheet number TQ

2. Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin 058

3. Take the east edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin 291

4. The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing TQ 0582916
