

Made and published by the Director General of the Ordnance Survey, Southampton.

Made and published by the Director General of the Ordnance Survey, Southampton.

COMPILATION DATA

Levelled: 1965
Boundaries: Apr 1977
(a) Surveyed.
(b) Reconstructed from former County Series plans and revised.
(c) Revised.

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey. The representation on this plan of a road, track or path is no evidence of the existence of a right of way. The alignment of canals where shown is approximate.

Revision point and bench mark coincident

ENGLAND & WALES
County
District
London Borough
Civil Parish (England)
Community (Wales)
Electoral Division
Ward
Constituency (Co or Boro)

SCOTLAND
County
Region or Islands Area
District
Electoral Division
Ward
Constituency (Co or Boro)

BOUNDARIES
Coincident boundaries are shown by the first appropriate symbol above, e.g. Boro Cont. & E.D. Bdy.
For Ordnance Survey purposes County Boundary is deemed to be the limit of the parish structure whether or not a parish area applies.

AREAS
Area measurement is in plan only.
The number and area, in hectares (ha) and acres, is shown within each parcel of land.
EXAMPLE: 4.257 parcel number
1.8207ha area in hectares
4.47 area in acres
When identifying a parcel it is important to specify the number of the plan on which it falls.
Enclosures or features joined for measurement of area
Limit of area within which individual parcels are not shown
To convert hectares to acres multiply by 2.47105
To convert acres to hectares multiply by 0.40469

NATIONAL GRID REFERENCE
The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point within 10 metres proceed as follows:
EXAMPLE from sheet TQ 0529
1. Take the two letters preceding the sheet number TQ
2. Take the west edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin 29
3. Take the east edge of the grid square in which the point lies and read the figure opposite this line on the east or west margin 29
4. The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing TQ 0529 29 29
For further information see 'An Introduction to the Projection for Ordnance Survey Maps and the National Reference System.'
