

PARCEL NUMBERS AND ACREAGES
The number and acreage of each parcel of land is shown within the parcel. It is important when identifying a parcel to specify the number(s) of the plan(s) on which it falls.
IN PARCELS DIVIDED BY THE SHEET EDGE, THE ACREAGES ARE SHOWN TO SHEET EDGE ONLY.

Conversion Scale Acres-Hectares

REFERENCE

For further information see Reference Card published separately.

NATIONAL GRID REFERENCE

The lines on the plan form part of the National Grid and are spaced at 100 metre intervals. To give a large scale reference defining the position of a point to the nearest 10 metres proceed as follows:-

EXAMPLE: B in Bridge Farm

EASTING	NORTHING
Take west edge of square in which point lies and read the figure opposite this line on NORTH and WEST margins	Take south edge of square in which point lies and read the figures opposite this line on EAST and SOUTH margins
Estimate tens of metres from the grid line	Estimate tens of metres from the grid line
268	241
2683	2414

TEN METRE REFERENCE: TF 26832414

For further information see "The Projection for Ordnance Survey Maps and Plans and the National Reference System". The representation on this plan of a road, track or path is no evidence of the existence of a right of way. 1 square inch on this plan represents 996 ft on the ground. The alignment of roads shown is approximate.
