(c) Revised

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.
Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.
The representation on this plan of a road, track or path is no evidence of the existence of a right of way.
The alignment of a canal, where shown, is approximate.

HECTARES-ACRES

0 1 2 3 4 5 6 7 8 9 10 11 12 Hectares

0 1 2 3 4 5 6 7 8 9 10 11 12 Acres

AREAS

Area measurement is in hectares only.
The number and area, in hectares (ha) and acres, is shown within each parcel of land.
EXAMPLE: 4267 parcel number
1.407ha area in hectares
4.47 area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls.
Endnotes or features joined for measurement of area
Limits of area within which individual parcels are not shown
To convert hectares to acres multiply by 2.471 05
To convert acres to hectares multiply by 0.404 69

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point in within 10 metres proceed as follows:

EXAMPLE from sheet TQ 0529

1. Take the two letters preceding the sheet number: TQ

2. Take the west edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin: 058

3. Take the east edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin: 291

4. The full reference is then TQ 058 291
