

COMPILED DATA

Levelled.....1965
 Boundaries.....Oct 1974

(b) Mar 1974

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General of the Ordnance Survey, Southampton.

HEIGHTS are given in METRES above the Newlyn Datum.
 Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.
 The representation on this plan of a road, track or path is evidence of the existence of a right of way.
 The alignment of tunnels where shown is approximate.

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:

EXAMPLE from sheet TQ 0529

1. Take the two letters preceding the sheet number.....TQ

2. Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin.....058

3. Take the east edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin.....291

4. The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing.....TQ 0582916

For further information see "An Introduction to the Projection for Ordnance Survey Maps and the National Reference System."

AREAS

Area measurement is to plus edge only. The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: 4267.....parcel number
 1-809ha.....area in hectares
 4-47.....area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls. Enclosures or features joined for measurement of area are not shown. To convert hectares to acres multiply by 2-47105. To convert acres to hectares multiply by 0-40469.
