Area measurement is to plan edge only. The number and area, in hectares (ha) and acres, is shown within each parcel of land. Enclosures or features joined for measurement of area. To convert hectares to acres multiply by 2.471 05. To convert acres to hectares multiply by 0.404 69.

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:

1. Take the two letters preceding the sheet number.....TQ 059

2. Take the west edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin.....058

3. Take the south edge of the grid square in which the point lies and read the figure opposite this line on the east or west margin.....291

4. The full six figure reference is given by writing first the letters, followed by the Easting and then by the Northing.....TQ 0582916
