

Made and published by the Director General of the Ordnance Survey, Southampton.

## COMPILATION DATA

Levelled.....1965  
Boundaries...Nov 19771:2500 scale \* 1:2500 scale (photographically reduced)  
(a) Surveyed.  
(b) Reconstructed from former County Series plans and revised.  
(c) Revised.

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.  
Bench mark data, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.  
The representation on this plan of a road, track or path is no evidence of the existence of a right of way.  
The alignment of tunnels where shown is approximate.

N TF1617-1717

Made and published by the Director General of the Ordnance Survey, Southampton.

AREAS  
Area measurement is to plan edge only.  
The number and area, in hectares (ha) and acres, is shown within each parcel of land.EXAMPLE: 1.007ha  
4.47 acres  
area in hectares  
area in acresWhen identifying a parcel it is important to specify the number of the plan on which it falls.  
Enclosures or features joined for measurement of area.  
Limit of area within which individual parcels are not shown.  
To convert hectares to acres multiply by 2.471 05  
To convert acres to hectares multiply by 0.404 69NATIONAL GRID REFERENCE  
The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres—rounded as follows—

EXAMPLE from sheet TQ 0529

1. Take the two letters preceding the sheet number. TQ 058  
2. Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin. Estimate tens of metres from the grid line to the point (distance x). 058  
The resulting four figure number is the Easting. 058  
3. Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin. Estimate tens of metres from the grid line to the point (distance y). 291  
The resulting four figure number is the Northing. 291  
4. The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing. TQ 058058 291  
For further information see the introduction to the Projection for Ordnance Survey Maps and the National Reference System.
