BOUNDARIES

England & Wales	Scotland

Where boundaries coincide the symbol shown is the first applicable in the table above, e.g. Burgh Gaird & ED Bdy.

For Ordnance Survey purposes County Boundary is deemed to be the limit of the parish structure whether or not a parish area exists.

New boundary symbols adopted for England and Wales 1974.

AREAS

Area measurement is to plan edge only.
The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: 4267.....parcel number
1.907ha.....area in hectares
4.67.....area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls.
Limits of area within which individual parcels are not shown.

To convert hectares to acres multiply by 2.471 05
To convert acres to hectares multiply by 0.404 69

NATIONAL GRID REFERENCE

The grid lines form parts of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows—

EXAMPLE from sheet TQ 059

1. Take the two letters preceding the sheet number.....TQ
2. Take the west edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin.....058
3. Take the south edge of the grid square in which the point lies and read the figure opposite this line on the east or west margin.....059
The resulting four figure number is the Northing.....058059
The resulting four figure number is the Easting.....058059
