

Compilation Data

Levelled..... 1965
Boundaries..... Aug 1974

(b) Feb 1974

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.
Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.
The representation on this plan of a road, track or path is evidence of the existence of a right of way.
The alignment of tunnels where shown is approximate.

VEGETATION CLASSIFICATION. Where space permits, tree and scrub symbols in woods are shown in groups of four, three, two or singly to indicate close, medium, open or scattered density of trees or scrub.

BOUNDARIES

England & Wales	County	Scotland	Geographical County
London Borough	District	Borough	County Council
Civil Parish	Community (Wales)	Dist. Bd.	County of the City
Electoral Division	Electoral Division	Borough	District Council
Ward	Ward	Borough	Civil Parish
Partly Constituency	Partly Constituency	Co. Const. Bd.	Partly Constituency & Ward

Where boundaries coincide the symbol shown is the first applicable in the table above, e.g. Boro Const & ED Bd.

For Ordnance Survey purposes County Boundary is deemed to be the limit of the parish structure whether or not a parish area exists.

New boundary symbols adopted for England and Wales 1974.

AREAS

Area measurement is to plan edge only.
The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: 4267..... parcel number
1829ha..... area in hectares
4.47..... area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls.
Enclosures or features joined for measurement of area.
Limit of area within which individual parcels are not shown.

To convert hectares to acres multiply by 2.471 05
To convert acres to hectares multiply by 0.404 69

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:

EXAMPLE from sheet TQ 0529

- Take the two letters preceding the sheet number..... TQ
- Take the easting of the grid square in which the point lies and read the figures opposite this line on the north or south margin..... 292
- Take the northing of the grid square in which the point lies and read the figures opposite this line on the east or west margin..... 058
- Take the easting of the grid square in which the point lies and read the figures opposite this line on the north or south margin..... 291
- Take the northing of the grid square in which the point lies and read the figures opposite this line on the east or west margin..... 059
