VEGETATION CLASSIFICATION. Where space permits, tree and scrub symbols in woods are shown in groups of four, three, two or singly to indicate close, medium, open or scattered density of trees or scrub.

BOUNDARIES	
England & Wales	Scotland
County	Geographical County
District	County Council
London Borough	Borough
Civil Parish	District
Community (Wales)	District Council
Electoral Division	District Council
Ward	Civil Parish
Ward Bdy	Civil Parish
Parish Const Bdy	Parish Const Bdy
County Const Bdy	County Const Bdy

Where boundaries coincide the symbol shown is the first applicable in the table above, e.g. Borough Const & E.D. Bdy.

For Ordnance Survey purposes County Boundary is deemed to be the limit of the parish structure whether or not a parish area exists.

AREAS

Area measurement is to plan edge only.

The number and area in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: 4267..... parcel number

4.47..... area in hectares

10.60..... area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls.

Enclosures or features joined for measurement of area.....

Limit of area within which individual parcels are not shown.....

To convert hectares to acres multiply by 2.471 05

To convert acres to hectares multiply by 0.404 69

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metres intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:-

EXAMPLE from sheet TQ 0529

1. Take the two letters preceding the sheet number..... TQ

2. Take the west edge of the grid square in which the point lies and read the figure opposite this line on the north or south margin..... 058

3. Take the east edge of the grid square in which the point lies and read the figure opposite this line on the east or west margin..... 291

4. The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing..... TQ 058 291
