Where boundaries coincide the symbol shown is the first applicable in the table above, e.g. Borough & ED Bdy
For Ordnance Survey purposes County Boundary is deemed to be the limit of the parish structure whether or not a parish area adjoins.

New boundary symbols adopted for England and Wales 1974.

Boundary merrings
B.B. Base of Bank
C.B. Centre of Bank
C.S. Centre of Stream, etc.
C.D. Centre of Drain, etc.

Imperial equivalents for metric boundary merrings
0.91m = 3ft
1.2m = 4ft

Area measurement is to plan edge only.
The number and area, in hectares (ha) and acres, is shown within each parcel of land.EXAMPLE: 1:800ha parcel number
4:47 area in acresWhen identifying a parcel it is important to specify the number of the plan on which it falls.
Enclosures or features joined for measurement of area
Limit of area within which individual parcels are not shown
To convert hectares to acres multiply by 2.471 05
To convert acres to hectares multiply by 0.404 69

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows:-

EXAMPLE from sheet TQ 0529

1. Take the two letters preceding the sheet number TQ
2. Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin 058
3. Take the east edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin 291
4. The full ten metre reference is given by writing the letters, followed by the Easting and then by the Northing TQ 0582916

For further information see 'An introduction to the Projection for Ordnance Survey Maps and the National Reference System'.
