(a) Surveyed.
(b) Reconstructed from former County Series plans and revised.
(c) Revised.

Surveys of changes since the publication of this plan may be available. Enquiries should be addressed to the Director General or to the local Ordnance Survey office.

HEIGHTS are given in METRES above the Newlyn Datum.
Bench mark lists, which may contain later levelling information and particulars of bench marks to which no values have been shown, are obtainable from the Director General, Ordnance Survey.
The representation on this plan of a road, track or path is no evidence of the existence of a right of way.
The alignment of tunnels where shown is approximate.

BOUNDARIES

England & Wales	Scotland
County	Region or Islands Area
District	District
London Borough	Not shown
Civil Parish (England)	
Community (Wales)	
Electoral Division	Electoral Division
Ward	Ward
Constituency (Co or Boro)	Constituency (Co or Boro)

Coincident boundaries are shown by the first appropriate symbol above, e.g. Boro Const & E.D. Bdy.

For Ordnance Survey purposes County Boundary is deemed to be the limit of the parish structure whether or not a parish area exists.

Imperial equivalents for metric boundary measurements
0.91m = 3ft 1.22m = 4ft

AREAS

Area measurement is to plain edge only.
The number and area, in hectares (ha) and acres, is shown within each parcel of land.

EXAMPLE: 4.267 parcel number
1.9207ha area in hectares
4.47 area in acres

When identifying a parcel it is important to specify the number of the plan on which it falls.
Enclosures or features joined for measurement of area
Limit of area within which individual parcels are not shown
To convert hectares to acres multiply by 2.471 05
To convert acres to hectares multiply by 0.404 69

NATIONAL GRID REFERENCE

The grid lines form part of the National Grid and are at 100 metre intervals. To give a unique reference defining the position of a point to within 10 metres proceed as follows—

EXAMPLE from sheet TQ 0529

- Take the two letters preceding the sheet number—TQ
- Take the west edge of the grid square in which the point lies and read the figures opposite this line on the north or south margin—058
- Take the east edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin—291
- Take the south edge of the grid square in which the point lies and read the figures opposite this line on the east or west margin—058

The resulting four figure number is the Northing—058291

The full ten metre reference is given by writing first the letters, followed by the Easting and then by the Northing—TQ 058291.6
