%
Care provision

The chart below shows the proportion of the residents in ward who provide care, compared with South Holland as a whole. Gedney is ranked number 1 for percentage of population providing 1 or more hours of unpaid care per week in South Holland, with Gedney ward having the highest percentage of residents providing unpaid care and Spalding St John's providing the lowest. This could be as a result of greater need for care or less access to paid care services.

Children living in poverty

The next chart shows the percentage of children aged 0 - 15 living in families that are income deprived. That includes families in receipt of income support, income based jobseeker's allowance or pension credit, or those not in receipt of these benefits but in receipt of Child Tax Credit with an equivalised income (excluding housing benefits) below 60% of the national median before housing costs. The percentage of children
living in poverty in South Holland is 16.1%. Within South Holland this varies from 31.5% in Sutton Bridge to 7.7% in Spalding Wygate. This compares with 17.7% for Norfolk.

### Percentage of children living in poverty

Corporate Priority - 'Your opportunity'

This section presents information about the local economy of Gedney Ward. It covers the information about the areas businesses, employment, skill levels and transport.
**Employment**

The following chart provides a breakdown of the Gedney Ward by socio-economic classification for all residents aged 16 – 74.

The National Statistics Socio-economic Classification (NS-SEC) provides an indication of socio-economic position based on occupation. It is an Office for National Statistics standard classification. To assign a person aged 16 to 74 to an NS-SEC category their occupation title is combined with information about their employment status, whether they are employed or self-employed, and whether or not they supervise other employees. Full-time students are recorded in the ‘full-time students’ category regardless of whether they are economically active or not.

The largest group is 'National Statistics Socio-Economic Classification - 6. Semi-routine occupations' representing 19.48% of the Ward's population.

Full-time vs part-time contracts

The map above demonstrates the proportion of ward population full time employment across South Holland based on data from the 2011 Census. While not a perfect indicator of stable employment (full time work may well be fixed term or perminant), it is a proxy measure for the lifestyle of residents and the prevailing economic conditions within South Holland's wards. Gedney is ranked number in 18 the district in terms of percent of population in full-time employment with 31.72%. Across South Holland, Spalding St John's has the highest proportion and Fleet having the lowest.
However, the areas where the percentage of full time employment are low do not necessarily correspond with areas where the percentage of part time employment is high. Higher proportions of part time employees are, again, not an exact indicator of personal economic insecurity - residents may chose to work part time for childcare purposes, or be semi-retired. What this does show us is whether there is diverse employment within any given ward, where both full and part time employment are available. Gedney is ranked number 13 in the district for percentage of residents in part time employment with 13.20. The wards with the highest and lowest proportion of residents in part time employment are Spalding Wygate and Fleet respectively. The map below illustrates the proportional distribution of part time employment across South Holland.
Indices of Deprivation

Deprivation covers a broad range of issues and refers to unmet needs caused by a lack of resources of all kinds, not just financial. The English Indices of Deprivation attempt to measure a broader concept of multiple deprivation, made up of several distinct dimensions, or domains, of deprivation. The chart below shows the Index of Multiple Deprivation (IMD) relating to Income Deprivation Affecting Children (ICACI) and Income Deprivation Affecting Older People (IDAOPI) as a percentage. These two indices represent the proportion of children aged 0-15 living in income deprived households and the proportion of older people aged 60 and over living in income deprived households respectively.
14.59% of Gedney’s residents have achieved level 4 qualifications and above compared to 23.60% in East Midlands as a whole and 32.76% of Gedney’s residents have no qualifications compared to 24.70% in East Midlands.

The map below shows the areas which where there are high levels of people with no qualifications.
No qualifications (%) (2011)

- ≥ 33.06 ≤ 36.69 %
- ≥ 31.19 < 33.06 %
- ≥ 27.83 < 31.19 %
- ≥ 25.22 < 27.83 %
The percentage of children gaining 5 or more A* to C grades at GCSE (including English and Maths) in Gedney is 19.4%. This compares with 51.2% for South Holland, 54.1% for the East Midlands region, and 56.6% for England. Within South Holland, Crowland and Deeping St Nicholas has the highest level of attainment at GCSE, with an attainment rate of 79.2 per cent. Fleet has the lowest level of attainment at GCSE, with an attainment rate of 16.8 per cent.
Transport

In a rural area such as South Holland, access to a vehicle can be an important lifeline - while households in possession of several may be an approximate measure for relative affluence. Gedney ward is ranked 16 among the wards of South Holland for car or van ownership, the chart below demonstrates the breakdown of cars owned in the ward and the average across the district:

Notable businesses

A large part of South Holland’s economy is dedicated to agriculture but there are a number of other significant businesses within the district. One such example is Bakkavor, a huge industrial firm which processes, packages and arranges transport for the food produced across the region.

Corporate Priority - Your Place

This section presents information about the place that is Gedney Ward. It covers the geographical area, population density and the local environment.
Gedney is one of the 18 Wards of South Holland. It has an area of 5,072 hectares which represents 6.83% of the total area of South Holland District.
Population Density

Gedney Ward has an average of 0.46 persons per hectare, compared to an average 1.20 persons per hectare across the entire South Holland District. Gedney Ward is ranked 17 out of 18 in terms of population density with 18 being the lowest in South Holland.

The largest number of households lives in 'Number of all households - Owned outright' accommodation with 45.3% of the Ward's households. That compares with 39.2% for the District as a whole, 36.0% for Lincolnshire County and 32.9% for the whole of East Midlands.

The second largest number of households lives in 'Percentage of all households - Owned with a mortgage or loan' accommodation with 31.9% of the Ward's households. That compares with 33.3% for the District as a whole, 32.6% for Lincolnshire County and 34.7% for the whole of East Midlands.
There are 12.9% of 'households rented from council or equivalent' with 1.7% of 'households rented from other social landlords'. That compares to an average for the District as a whole of 10.3% for Council rented properties and 2.4% for other social landlords.

Average household size in Gedney Ward is 2.47 people per household, compared to 2.30 people per household in South Holland District. The Average number of bedrooms per household is 3.00, compared to 2.80 bedrooms per household in South Holland.

The Ward has 86 households with dependent children aged 0 to 4, representing 9.04% of the Ward's households. 241 households in the Ward have 'Dependent children in household: All ages', representing 25.34% of the Ward's households.

The percentage of children assessed as having a good level of development at the age of 5 in Gedney is 28.7%. This compares with 65.6% for South Holland, 57.7% for the East Midlands region, and 60.4% for England. Within South Holland, Crowland and Deeping St Nicholas has the highest proportion of children assessed as having a good level of development at age 5 at 79.2 per cent. The Saints has the lowest level of children reaching a good level of development, with an attainment rate of 18.2 per cent.

Corporate Priority - Your Home

This section presents information about the place that is Gedney. It covers information around housing types and provision.

Heating and Overcrowding

The table below shows that 3.2% of households in Gedney Ward have no central heating, compared to 1.9% across the South Holland District. 2.1% of households are overcrowded, compared to 4.1% in the rest of the District.

South Holland as a whole is number 1 of 7 in terms of lowest claimant numbers for Jan 2019 within Lincolnshire.
Income deprivation

This is the % of people living in low income families reliant on means tested benefits. It is the income domain score for the Indices of Multiple Deprivation (IMD) 2015 and is a measure of deprivation in the area. The difference in deprivation between areas is a major determinant of inequality in the UK. Many studies and analyses have demonstrated the association of increasingly poor health with increasing deprivation. For instance, all cause mortality, smoking prevalence, self-reported long standing illness are all correlated with deprivation. If deprivation inequalities decrease, health inequalities are likely to decrease also and can help reduce pressure on some council services.

The % of people living in low income families in Gedney is {ERROR: Please specify a metric type}. Within South Holland it totals {ERROR: Please specify a metric type} and varies throughout the district from {ERROR: Please specify a metric type} people in no value to no value people in no value.
**Barriers to Housing and Services**

Barriers to Housing and Services consists of two sub-domains: 1) ‘geographical barriers’ which measures accessibility of shops, GPs, schools and Post Offices and 2) ‘wider barriers’ which includes issues relating to access to affordable housing.

The map shows deprivation by rank (1 - 32,482) with the higher ranks indicating areas that are less deprived and the lower ranks showing the more deprived areas in relation to barriers to housing and services.
**Digital Exclusion**

Digital exclusion is the exclusion from accessing goods and services online, it is strongly linked to those with low income and poor health and causes further disadvantage.

The barriers around digital exclusion include:
- Connectivity - access to the internet.
- Accessibility - meeting all users’ needs, including those dependent on assistive technology.
- Digital skills - ability to use computers and the internet.

Digital inclusion is about reducing exclusion, making sure that people are able to use the internet in order to access services that can benefit them day to day – this is vital for both individuals and organisations.

The map below shows the likelihood of digital exclusion within the district, with decile 1 meaning there is a high probability for digital exclusion and decile 10 showing a low probability.
As a comparison, this map shows the attitude to using the web ranked 1-10 with the most negative attitudes rated as 1. Looking at the two maps, you can see that despite a high probability for exclusion, attitudes to using the web remain quite positive.
